e-Portfolios and Virtual Learning Environments from Smart Computer Systems & Webanywhere

Smart Computer Systems are pleased to announce our partnership with Webanywhere. We have been looking for an easy to use learning platform for schools and have now found the provider.

Webanywhere have been established for **10 years** and have over **3,000 customers** worldwide. They offer e-portfolios and virtual learning environments designed specifically for primary schools. These products are very easy to use for staff and students, and help to engage the family at home with their child's learning.

We have negotiated special pricing for Smart-Net schools and have improved Smart-Net to make it even easier to use and maintain.

You can sign up for a **free trial** of the software on line by going to:

Your primary school learning platform

"At Pakaraka School we use Learner Journey and Learnanywhere products provided by Webanywhere. Both products are easy to use for staff and students and really help us engage with the parents and extended families at home. The initial training we received from Webanyhere was excellent, and we also have access to simple on line video help, or can contact Webanywhere by telephone if required. Our students love the simplicity of the software."

Vee Singh, Principal, Pakaraka School, Northland.
