Sharing Local Files to Smart-RAS

1. When you have the Remote Desktop connection window open, click on “Show Options” bottom left.

2. Click on “Local Resources” → “More” → [+] Drives and then tick the drive you want to have access to while connected to the Smart-RAS.

3. Click “OK” and then “Connect”.

4. Once you are logged into the Smart-RAS, you will see under “My Computer” an extra drive like the one circled. It will have you computers name instead of CASEY-PC.
